TOP PROJECTS

MINISHELL
Technology: C, Makefile

This **team project** involves building a miniature bash in robust **C**, offering a hands-on experience with **processes**, **file descriptors**, **parsing algorithms**, **computer theory**, and more.

MINIRT
Technology: C, Makefile

Crafted entirely in **C**, this team project introduces the captivating world of **Raytracing**.
Upon completion, You gain the ability to render **realistic Computer-Generated scenes** and **approach mathematical/scientific formulas with confidence**.

WEBSERV
Technology: C++, Makefile

This **C++** project involves creating a personal **HTTP server**, serving as a valuable introduction to the realms of **HTTP and RFC**s. It's an excellent opportunity to enhance **C++** and **object-oriented programming** skills.

IN PROGRESS...

FT_TRANSCENDENCE
Technology: Django, Python, PostgressSQL, JavaScript, CSS, HTML, ...

Web application, featuring a multiplayer online game, chat rooms, etc...
